Profile

Skilled Full-Stack Developer: Proficient in building scalable web applications with expertise in ReactJS for front-end development and Laravel for back-end solutions. Skilled in HTML, Bootstrap, CSS, JavaScript, and creating modular, reusable components. Experienced in database design and management using MySQL, performance optimization, cross-browser compatibility, and API development. Dedicated to staying current with industry trends and best practices while collaborating effectively in team environments.

Education

Associate of Computer Science   2022 – 2026 │ jeedah, Saudi Arabia
Arab Open University EGYPT Branch
 Software Engineering Track Arab Open University, In progress, expected graduation 2026

Front-End Diploma   2023/11 – 2024/04 │ Alex, Egypt
Amit 🔗
I have learned HTML, CSS, Bootstrap, Javascript, and React.js

Back-End Diploma   2024/05 │ Alex, Egypt
Amit 🔗
- Acquiring comprehensive knowledge and practical skills in PHP, MySQL, and PHP Larvel.

Professional Experience

Full Stack Developer   2024/11 – present │ Alexandria, Egypt
Inom-Techs
I develop and maintain web applications using Laravel, MySQL, and Breeze for authentication and front-end integration. My responsibilities include building efficient APIs, designing secure database structures, implementing interactive user interfaces, and troubleshooting issues to ensure seamless functionality across systems.

Instructor   2023/09 │ Alex, Egypt
Techno Future Academy
I committed to enhancing my teaching effectiveness and engagement by improving my understanding and proficiency in programming concepts, tailored to students aged 9 to 17. I taught them Python, Web Development, C++, and Java.

Cocah   2023/09 – 2024/02 │ Alex, Egypt
Techno Future Academy
- Coached three age-diverse teams in various competitions.
- Instructed teams (ages 10-16) on Unity Engine, MIT App Inventor, and advanced presentation skills.
- Led a younger team (ages 4-6) in FLL, focusing on teamwork and communication.

- Conducted training in Lego-building, team-building, and robotics.
Achieved award-winning performances with all teams.

ReactJS Developer Projects:

Conflict Solution Company
- Saudi Law Company Website: Developed a responsive web application for a Saudi law company based on provided UI/UX designs. Project Link 🔗
- E-commerce Platform: Created a comprehensive e-commerce platform as a graduation project at AMIT. Implemented login functionality using dispatch, integrated user authentication via API, and utilized Redux for product management on the home page. Project Link 🔗 .

Projects

Out Seller 🔗   2024/11 – 2025/01

Laravel Project

Project Features: Developed a comprehensive project management platform with features such as time tracking, task assignment, invoicing, and payments. Integrated tools for project collaboration, client dashboards, help desks, and knowledgebases. Implemented workflow automation, dependency management, and lead tracking to enhance team productivity and streamline client interactions. Enabled easy proposal creation and seamless communication through an intuitive interface.
